Aksha Assist

AGENTS

Who gets notified for camera group Warehouse-A?

12:06 PM

Notification

Live

Configured recipients — not confirmed delivery. Delivery logs don't exist yet, so this never claims a message was received.

No notification configuration was found for Warehouse-A. Please note that this endpoint requires the group's actual database ID rather than its display name, so this identifier may not exist or simply has no settings configured. You may want to check Camera Operations to confirm the exact group details if needed.

> Show reasoning · 4 steps

EN

Ask about alerts, cameras or events...

Q3. Do we get a notification every time an alert fires, or only for certain types?

Aksha Assist

AGENTS

Do we get a notification every time an alert fires, or only for certain types?

12:06 PM

Notification

Live

Configured recipients — not confirmed delivery. Delivery logs don't exist yet, so this never claims a message was received.

Notifications are configured to be sent to googlecolab@algoanalytics.com, with a pending update to cctv.alerts@algoanalytics.com. Please note that while recipients are configured, delivery confirmation logs are not available, so I cannot confirm receipt of every individual alert.

> Show reasoning · 4 steps

EN

Ask about alerts, cameras or events...

Q4. Was the notification for alert ALT-10293 delivered?

Aksha Assist

AGENTS

Was the notification for alert ALT-10293 delivered?

12:06 PM

Notification

Live

Configured recipients — not confirmed delivery. Delivery logs don't exist yet, so this never claims a message was received.

I cannot confirm whether the notification for alert ALT-10293 was actually delivered, as our system currently tracks configured recipients rather than delivery-confirmation logs. The notification email is configured for googlecolab@algoanalytics.com, but we do not have logs to verify receipt. Please let me know if I can assist you with anything else.

> Show reasoning · 4 steps

EN

Ask about alerts, cameras or events...

Q5. List the notification recipients for the main gate group.

Aksha Assist

AGENTS

List the notification recipients for the main gate group.

12:07 PM

Notification

Live

Configured recipients — not confirmed delivery. Delivery logs don't exist yet, so this never claims a message was received.

No notification configuration was found for the main gate group. This means the group may not have any notification settings configured, that no camera group by that name or ID exists, or that the identifier used was not the group's actual database ID. Please check Camera Operations to confirm the exact group details if you are unsure.

Error & Status Explanation

error_explanation · 5 example queries

Q1. What does the camera status 'creating' mean?

 Aksha Assist

 AGENTS  

What does the camera status 'creating' mean?

12:08 PM

Error & Status Explanation

Documentation

The creating status indicates that the camera was just added and is still being provisioned by the backend. This is a transient state right after creating a camera rather than an error, so you can simply wait a moment and refresh. Please let me know if you need any further assistance with your system today.

> Show reasoning · 4 steps

EN 

Ask about alerts, cameras or events... 

Q2. What does 'offline' status mean for a camera?

 Aksha Assist

 AGENTS  

What does 'offline' status mean for a camera?

12:08 PM

Error & Status Explanation

Documentation

The offline status means that the camera is not currently connected or available to the Aksha backend. To resolve this, please check that the camera is powered on and reachable over the network, then verify its RTSP link and refresh the camera status. Please let me know if you need any additional assistance.

> Show reasoning · 4 steps

Camera Troubleshooting

camera_troubleshooting · 5 example queries

Q1. Why is cam3 not showing any video?

 Aksha Assist

 AGENTS  

Why is cam3 not showing any video?

12:09 PM

 Live

For cam3, video frames are actually arriving right now even though its status label still reads creating. This is very likely because the status label is stale from a transient provisioning state. No action is needed for the feed, and the label should clear on a refresh.

> Show reasoning · 4 steps

EN 

Ask about alerts, cameras or events... 

Q2. Which cameras have stopped sending frames?

 Aksha Assist

 AGENTS   

Which cameras have stopped sending frames?

12:09 PM

 Live

Please be assured that all checked cameras are currently healthy and actively sending video frames, with no cameras having stopped transmission. Although their status labels still read creating, video frames are arriving normally for all of them. Please let me know if you need assistance with anything else today.

> Show reasoning · 4 steps

EN 

Ask about alerts, cameras or events... 

Q3. Why does cam1-Gate-Camera say 'creating' for so long?

Aksha Assist

AGENTS

Why does cam1-Gate-Camera say 'creating' for so long?

12:10 PM

Live

For cam1-Gate-Camera, the status still reads creating, but video frames are actually arriving right now. This is very likely because the status label is stale, as 'creating' is a transient provisioning state and the camera has clearly finished provisioning since it is streaming. No action is needed for the feed; the label should clear on refresh, and if it never does, it is simply a cosmetic backend status issue rather than a video problem.

> Show reasoning · 4 steps

EN

Ask about alerts, cameras or events...

Q4. Why is the warehouse camera not detecting motion?

 Aksha Assist

 AGENTS  

Why is the warehouse camera not detecting motion?

12:10 PM

 Live

I am unable to confirm detection pipeline health or recent backend errors for the warehouse camera, as those metrics are not available in this system. All currently checked cameras are operating normally and streaming video frames successfully. Please let me know if you would like me to look into anything else regarding the system status.

> Show reasoning · 6 steps
